

# AXIS Body Worn Live

Right there with you

AXIS Body Worn Live streams live video, audio and metadata from Axis body worn cameras. Secure and reliable, it supports informed decision making by operators and provides an added sense of safety for the camera wearers. AXIS Body Worn Live has several layers of security, and the transmission is protected by full end-to-end encryption, ensuring that the customer owns their encryption keys. It offers 24-hour data retention, and stream gap retrieval ensures that the customer never misses a thing despite any temporary connection dropout. Being a web-based application it's compatible with PCs, tablets and Android mobile devices and works independently of the user's choice of video or evidence management system.

# AXIS Body Worn Live

<b>Application</b>	
<b>Supported products</b>	Axis body worn cameras
<b>User interface</b>	Web application
<b>Compliance</b>	CJIS compliant data transfer CJIS-compliant storage Data servers supporting regional regulatory requirements for personal integrity
<b>Administration</b>	Centralized role based access through AXIS Organization and Access Management Tool Multi factor authentication through My Axis
<b>Data streaming</b>	Video, audio, location
<b>Cybersecurity</b>	
	End-to-end encryption: XChaCha20-Poly1305, X25519 and XSalsa20 Encryption at rest: AES-256 bit Encryption in transit: TLSv1.2 or later with 256 bit ciphers
<b>Video</b>	
<b>Video compression</b>	H.264 (MPEG-4 Part 10/AVC) Baseline, Main and High Profiles 640x360 @ 25/30 fps
<b>Audio</b>	
<b>Audio encoding</b>	AAC
<b>System features</b>	
	Live stream triggers: Camera button Stream gap retrieval Priority upload of latest data Pre-buffer Multiple clients can view the same stream
<b>Communication</b>	Acknowledge stream
<b>Recording playback</b>	Access to recent streams for 24 hours Multiple simultaneous streams Time line scrubbing in live stream Go to live Audio mute
<b>General</b>	
<b>Storage</b>	24-hour retention time
<b>Positioning system</b>	Location data through GNSS
